DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, drawn to Network resource browsing or Interface customization or adaption, classified in class 715, subclass 738 and 744.
- II. Claims 33-68, drawn to User Navigation between devices or Configuration, classified in class 715, subclass 735 and 737.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, drawn to Network resource browsing or Interface customization or adaption and

Inventions II drawn to User Navigation between devices or Configuration are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06).

In the instant case, the different inventions I and II. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognize divergent subject matter, restriction for examination purposes as indicated is proper.

If applicant traverses the requirement on the basis that there is no search burden, the examiner will explain specifically which reason(s) apply.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h)
